

Reference

High Storage Systems

Conductor Rail 0831 **MultiLine**

Application

Satellite warehouse with 2 storage/retrieval systems with fully automatic transport connection to the production plant

- 4.904 pallet places
- 2 lanes
- 6 floors
- 960 channels
- Depth of the channel: 4 - 7 places

Country

Switzerland

City

Suhr

Representative office

Conductix-Wampfler AG (D)

Project installation date

July 2009

Operator

Mittelland Molkerei AG

Technical requirement[s]

- Power transmission for storage/retrieval systems
- Transmission of the control signal to the storage/retrieval systems

Environmental conditions

Warehouse for dairy products

Product[s]

Conductor Rail System, Program 0831 **MultiLine**

Collector

Double collector assembly for energy and control

System course

Straight

Length [System]

2 x 60 m

Number of poles

- 3 + PE [Power transmission]
- 3 [Transmission of the control signals]

Power

- 100 A [Power transmission]
- 60 A [Transmission of the control signals]

Voltage

400 V / 50 Hz [3 + PE]
